THE SILO HOTEL, CAPE TOWN, SOUTH AFRICA

Situated in the vibrant area of the V & A Waterfront in Cape Town, this monumental silo, once the tallest building in South Africa, originally stored corn. The designers from the internationally acclaimed Heatherwick Studio transformed the historical building into a stunning piece of art itself, where the outside with its faceted glass windows is as spectacular as the inside.

JUMEIRAH AL NASEEM HOTEL, DUBAI, U.A.E.

The Jumeirah Al Naseem hotel is the fourth and last hotel to be part of the luxurious Madinat Jumeirah resort, the largest of its sort in Dubai.

FIVE PALMJUMEIRAH DUBAI, U.A.E.

Set on a 200 meter private beach on the trunk of The Palm in Dubai, the FIVE Palm Jumeirah Dubai hotel offers modern Design combined with Arab hospitality.

SPACE-SAVING SOLUTIONS

CONCEALED CISTERNS

TECHNOLOGY BEHIND THE WALL

If you decide to change your hotel bathrooms in a modern and spacious well-being area, then a concealed solution is the best choice. Geberit as a European market leader in sanitary technology has been setting standards for more than 140 years. Geberit pioneered 1964 with the production of the concealed cistern and looks back on more than 50 years experience and success in that field.

Placing the cistern behind the wall and choosing a wall-hung solution has a lot of advantages. For your hotel bathroom it means saving space and more hygiene. As the cistern is behind the wall, the staff has got less to clean and cleaning the ceramics is also much quicker. Thus, this solution even saves time and money.

The advantages at one glance:

- Enhanced bathroom design thanks to concealed cistern.
- The cleaning of the bathroom gets easier and quicker thanks to the wall-hung solution.
- The maintenance of the cistern is really easy through the opening behind the actuator plate.

SPACE-SAVING

With a wall-hung and concealed solution you are saving space.

PREMIUM QUALITY

10 years guarantee and 25 years spare parts availability. Worldwide service.

EASY TO CLEAN

Cleaning below wall-hung solutions is really easy and time-saving.

RELIABLE

In Geberit products there is the experience of more than 60 mio installations.

EASY MAINTENANCE

The proved and tested products are easy and tool-free to maintain.

LOAD BEARING

The weight of the wall-hung WC is borne by the installation element and not by the wall and carries 400 kg.

SPECIAL REQUEST CONCERT.

The Geberit actuator plates make the difference. A wide variety of materials, forms, colours and surfaces offer a big playground for design wishes and styling options:

- Geberit Sigma offers front actuation.
- Guaranteed availability of functional spare parts for 25 years.
- The maintenance of the Geberit Sigma cistern is tool-free.

THE GEBERIT CLASSIC.

The Geberit Sigma cisterns have been tried and tested a lot and have proven their reliability in numberless projects. The cisterns can be installed in almost every bathroom situation and offer many design options in layouting your ideas. All the Sigma cisterns provide the connections for either a Geberit AquaClean or the Geberit DuoFresh function.

The advantages at one glance:

- The Geberit Sigma system covers a wide range of applications for all sorts of bathroom situations.
- The Geberit Sigma actuator plates come in a big variety of materials, forms, colours and surfaces and meet all design requirements.
- Concealed cisterns in combination with wall-hung ceramics save space, time and money and are more hygienic than conventional solutions.

Geberit Acanto WC ceramic, Geberit Sigma21 actuator plate, Geberit Acanto washbasin and furniture

The advantages at one glance:

- The Geberit Omega system is a solution provider for special applications.
- Wall-even actuators are an elegant option.
- There are three different installation heights possible with top or front actuation.

Geberit AquaClean Sella, Geberit Omega cover plate customised and remote flush actuation type 70

THE SOLUTION PROVIDER GEBERIT OMEGA

Geberit Omega – particularly small actuator plates, together with a concealed cistern that is available in three different installation heights. The result is impressive: Geberit Omega opens up unexpected opportunities when it comes to the design of your bathroom, where bottlenecks such as windows and roof pitches are elegantly mastered.

Omega60

Can be mounted surface-even

Omega30

Omega20

When space is short, an innovative flush actuation from Geberit Omega can provide the necessary flexibility. It can be optionally mounted on top or in front of a prewall.

PUBLIC SOLUTIONS

DESIGN AND FUNCTION RECONCILED

The public areas of a hotel are the hallmarks of quality and design and will set trends public for sanitary rooms with the various design families of actuator plates and covers from Geberit. Models are available in die-cast zinc and stainless steel to meet the highest standards of safety and durability. Dual-flush and stop-and-go flush equipment for WCs make operation more economical by lowering water consumption. Infrared and pneumatic flush actuations supplement the product range of high-quality actuator plates.

Sigma50 design family			

The Geberit urinals Preda and Selva are the first urinals that do not have to be removed for maintenance. A huge plus for hotels. These urinals are really easy to service. The Geberit urinal Tamina is the perfect solution for quick renovations, as, due to its size, it covers up the openings of the older - and usually big - urinal ceramics. There is no intervention in the building structure necessary.

WATER-SAVING OVERALL CONCEPT
 The spray head has been precisely designed to fit the clever inner geometry of the ceramic pan. As a result, just 0.5 litres of water are enough to ensure an optimal flushing out. Even lower water consumption is achieved by the individually adjustable flushing programmes, such as the intelligent interval flushing.

NO CONCEALED DIRT
 The rimless ceramic pans facilitate cleaning, improve hygiene and prevent unpleasant odours. It is getting easier and faster for the cleaning staff.

AS EASY AS PIE
 The practical docking station enables access to the control unit at any time and can be removed with one hand.

Geberit urinal Preda, Geberit urinal division

The advantages at one glance:

- The Geberit urinals Preda and Selva are available with a classical flush system, an integrated one or waterless.
- Upgrading is possible at any time.
- Rimfree ceramic pans.
- No need to remove the pan for maintenance, service or upgrade.
- Unified design families of the actuators.
- Urinal flush actuations with anti-theft protection.

Geberit iCon WC ceramic, washbasin, mirror and furniture,
Geberit Sigma20 actuator plate, Geberit washbasin tap Brenta

The advantages at one glance:

- User-friendly handling.
- Fast response with dual-beam IR detection.
- Touchless operation for improved hygiene.
- Interval flush with adjustable flush time.
- Design and surfaces easy to clean and to maintain.
- Easy to service.
- Protection against vandalism.

THE PUBLIC CALLING CARDS

ELECTRONIC TAPS

For semi-public and public areas of a hotel, it is important to have products installed that are hygienic and easy to clean. In the past, it was the control technology which made many touchless taps larger and less elegant than conventional taps. Geberit's new tap system provides a superior solution to this problem.

The Geberit washbasin taps Piave and Brenta feature a slim, elegant design, thanks to the tap housing being anchored in the Geberit installation system behind the wall.

↑
There are deck-mounted and wall-mounted solutions, whereof the wall-mounted taps are even more hygienic, as there are no slots or edges where splash water could aggregate.

SLIM DESIGN THANKS TO CONCEALED TECHNOLOGY

- 2 Geberit washbasin tap Brenta, wall-mounted
- 3 Geberit washbasin tap Piave, deck-mounted
- 4 Geberit washbasin tap Piave, wall-mounted

THE PUBLIC CALLING CARDS

SOUNDS GOOD, LOOKS GREAT

Noise reduces our quality of life. We all feel disturbed by noise, especially when we try to sleep, read a book or focus on our work. This is why a great deal of effort is made to make buildings quiet. However, one source of noise is often neglected – waste water.

This disturbance is not necessary. It is possible to improve the residents' quality of life and as a result the value of the building by paying more attention to planning and installation – and with the help of Geberit.

Sanitary installations do not need to be noisy. Geberit offers all you need to achieve silence: a

system of silent and easy-to-install products as well as specialised know-how in planning and installation. Reducing sanitary noise is easier than you may think. The effect is not only audible, but also visible, since silent Geberit installations are an ideal basis for great bathroom designs.

SILENT DISCHARGE PIPING:
reduces the noise at the
source.

PREWALL WITH ACOUSTIC
INSULATION:
stops noise from travelling
through the walls.

SAME-FLOOR DRAINAGE:
protects the neighbours.

WALL-HUNG TOILET:
stops noise from travelling
through the floors.

The advantages at one glance:

- No invasion of the hotel guest's privacy.
- No complaints due to bathroom noise from guests.
- No restrictions in your bathroom design.

Geberit Xeno² WC ceramic, Geberit Sigma70 customised actuator plate

GOOD STYLE IS A MATTER OF FORM

Geberit iCon WC ceramic, washbasin, mirror and furniture, Geberit Sigma50 actuator plate, Geberit wall-drain

THE BATHROOM OUTFIT

CERAMICS

AND FURNITURE

Geberit introduced the Bathroom Collection – a product range including Geberit labelled ceramics and bathroom furniture. There are different series available, meeting every taste and style.

The advantage to combine the technique behind the wall with the ceramic products in front of it are obvious: everything comes from one source, as well as consulting, delivery and service.

↑
Geberit iCon WC and bidet ceramic, washbasin, mirror and furniture, Geberit Sigma50 actuator plate

Geberit was long known for the installations behind the wall. In the meantime the product portfolio is moving in front of the wall with a wide range of ceramic toilet bowls, washbasins, bathtubs, shower trays, shower walls, mirrors and furniture. For every taste the right product lines.

↑
Geberit Xeno² WC ceramic, washbasin, mirror and furniture, Geberit Sigma50 actuator plate, Geberit CleanLine

The advantages at one glance:

- One for all: the bathroom equipment from one source.
- High-quality products.
- Many different designs: for every taste the right option.

Geberit iCon washbasin, furniture and mirror

Rimfree

The advantages at one glance:

- Significantly lower bacteria build up.
- All stains are visible and easy to remove.
- Reduced use of chemicals.
- Ideal for hotels, as the cleaning is fast and easy.
- With the KeraTect glaze the surface of the ceramic gets smoother and thus even easier to clean.

A HYGIENIC PLUS FOR THE SMALLEST ROOM

RIMFREE LIFE

Geberit offers a large range of toilet ceramics without a rim. That makes the cleaning extremely easy as you reach the whole surface and see every spot.

A classic rim is a good place for bacteria and urine scale deposits. Without that rim, stains are easily detected and removed. Ideal for places with a high hygienic standards.

Additionally to the rimfree toilet bowl, a special glaze called KeraTect makes the surface so smooth that dirt has no chance. Especially in the long run it pays, as dirt or lime scale cannot accumulate. That glaze is optionally available for almost all models.

←
A Geberit Rimfree WC bowl is flushed with a patented system and is cleaning it thoroughly.

The Geberit ceramics Citterio and Geberit Xeno² bathroom series are available with KeraTect, a fired to form glaze, that arrays the ceramics' surface with an extremely smooth and long-lasting cover. This helps to keep the surface clean, as dirt has no chance to adhere to the WC.

→

STANDARD TOILET WITH A RIM

The classic rim is hard to clean and is promoting deposits for bacteria, lime scale and urine scale.

RIMFREE WC

A rimfree ceramic is the most hygienic solution and there is no need to use aggressive cleaners.

WELL-BEING BEGINS IN THE BATHROOM

GEBERIT AQUACLEAN

Pamper your guests with a new dimension in well-being. With Geberit AquaClean shower toilets, you will create the perfect atmosphere for wellness and complete satisfaction and thus exceed your guests' expectations and requirements in terms of comfort and hygiene before they have even left their hotel room.

Cleaning with water is not only especially gentle and thorough, it also gives you a unique feeling of freshness and cleanliness – the whole day long.

HOW IT WORKS:

- 1 Preheat your toilet seat.*
- 2 Bad odours are getting extracted
- 3 The WhirlSpray shower technology offers a more intense cleanliness with reduced water consumption.
- 4 The TurboFlush technology flushes out extremely thoroughly and quietly.
- 5 The dryer ensures optimal drying.
- 6 The orientation light * serves as a guide at night.

PRODUCTS:

- 1 Geberit AquaClean Mera white
- 2 Geberit AquaClean Mera chrome
- 3 Geberit AquaClean Sela wall-hung
- 4 Geberit AquaClean Sela floor-standing
- 5 Geberit AquaClean Tuma

DESIGN PLUS

powered by: ISH

* Geberit AquaClean Mera Comfort only.

Build on quality: all Geberit AquaClean shower toilets are QPlus-certified. You find more information on → www.qplus.ch

The advantages at one glance:

- Simple, hygienic cleaning.
- Intuitive, self-explanatory operation.
- Reliable technology and high-quality materials ensure a long service life.
- Connections for water and electricity can be integrated, making them invisible.
- Low energy and water consumption.
- Easy to maintain.

Geberit AquaClean Mera, Geberit Sigma70 actuator plate

The advantages at one glance:

- A floor-even shower upgrades the look of your bathroom.
- The wall drain allows a homogenous tiling and enables an efficient cleaning.
- The maintenance of the wall drain is quick and easy.

Geberit Setaplano, Geberit iCon WC ceramic and mirror, Geberit iCon wasbasin and furniture

IN THE WALL OR IN THE FLOOR

SHOWER DRAINS

Thanks to the covers that are available in different designs, the wall drain fits into every bathroom, into every ambience.

1 Geberit wall drain

2 Geberit CleanLine

3 Geberit shower surface Setaplano

4 Geberit floor drain

YOU HAVE THE CHOICE.

- 1) The water gets drained through the wall – which gives you the chance to keep the floor completely obstacle-free.
- 2) The Geberit CleanLine floor drain, that is smoothly integrated in the floor.
- 3) The Geberit shower surface Setaplano, that feels silky smooth and warm to the touch.

Those three variants are easy to clean due to a removable hair-sieve in the wall drain, and the optional collector profile, or the clever sieve solution in CleanLine and Setaplano.

- 4) The last option is the classical square floor drain that comes in three designs.

GOOD. BETTER.
EFFICIENT.

Geberit AquaClean Sela, Geberit Monolith, Geberit iCon washbasin and furniture, Geberit floor drain with grating "Square"

A POTENTIAL CLASSIC OF THE FUTURE

GEBERIT MONOLITH

HIGHLIGHTS

FOR A BATHROOM WITH AN AURA OF LUXURY

Geberit Monolith – this name stands for a unique and timeless elegance in connection with a WC, a washbasin and a bidet. The installation of the sanitary module is simple and usually does not need any structural modifications.

COMBINATIONS ARE ALLOWED

The Geberit Monolith sanitary modules offer undreamed-of possibilities for the design of your bathroom. Be it only one alone or combined with a second or third one. If you cannot do without a bidet, just place the respective module next to the one of the WC and the picture is complete.

← **GENTLE**

Fan for odour extraction

↑
Geberit Monolith for WC and bidet with iCon ceramics

The advantages at one glance:

- The sanitary modules are available for WC and bidet.
- They are available in different heights.
- The installation is quick and easy.

Geberit Monolith with iCon WC ceramic, Geberit wall drain

WITHOUT BREAKING THE WALL

RENOVATION IN A FEW HOURS

Does your hotel need a soft renovation and you do not want to spend too much time? Do you want to avoid retiling and breaking down walls? The Geberit Monolith is the perfect choice for this. In only a few hours the bathroom can be used again as neither the wall nor the floor tiles will be affected.

BEFORE RENOVATION

The installation of the Geberit Monolith is a simple, quick and clean solution for renovations. The walls do not need to be opened and existing water and drainage connections can be used. Work is kept to a minimum.

Geberit Monolith with floor-standing AquaClean Sela

AFTER RENOVATION

The appearance of the Geberit Monolith cannot be compared to common exposed cisterns. A very elegant upgrade to a bathroom.

FRESH AIR

GEBERIT

DUOFRESH

Geberit DuoFresh is your recipe for constantly fresh air in the hotel bathroom. Even without windows or an additional ventilation system, you have an energy-saving possibility to ventilate the room.

Bathrooms in hotels are usually inside recumbent. This means that a good ventilation is necessary to keep the air fresh. The Geberit DuoFresh extracts the unpleasant odours at their source and purifies the air using the active carbon filter which is concealed behind the actuator plate. The filtered and cleansed air is released back into the room. After ten minutes the ventilation stops automatically.

←
ACCESSIBLE
The filter and the insert for in-cistern blocks are easily accessible via the actuator plate.

←
QUIET
A very quiet ventilator is releasing the fresh air back into the room.

←
EFFICIENT
The air is purified efficiently with the aid of the active carbon filter.

←
DIRECT
Unpleasant odours are extracted directly at their source inside the WC ceramic.

The advantages at one glance:

- Odours evidently influence our mood. Geberit DuoFresh erases the bad ones immediately where they occur.
- It is more efficient and energy-saving than room sprays or open windows.
- The functionality of DuoFresh is not affected by the size of the room.
- Easy handling by the touch of a button.

PRECIOUS LONGEVITY

Geberit CleanLine, Geberit Sigma70 actuator plate, Geberit iCon WC and bidet ceramic, washbasin, furniture and mirror.

The advantages at one glance:

- Save space, time and money by choosing Geberit's concealed and wall-hung solutions.
- Working with Geberit ensures project support and planning reliability.
- Geberit makes sure that the planners, architects and installers get the product knowledge-transfer to guarantee a smooth project flow.

SOPHISTICATED BATHROOM PLANNING

GENUINE PARTNERSHIP

**GEBERIT IS THE CHOICE FOR HOTEL PROJECTS
FOR A LOT OF REASONS.**

- More than 140 years experience in the sanitary industry.
- Proven reliability of the Geberit products: they are functional, efficient and sustainable.
- The design of the products fulfill a hotel guest's wish for emotional well-being.
- Appliances in front of and behind the wall from one source.
- Geberit products are easy to maintain.
- You have the freedom of planning in new projects.
- And you get elegant solutions for a hotel renovation.

RECOGNISED SERVICE

Our work has won awards. Geberit regularly wins prizes for outstanding performance in the area of sustainability. The Canadian media company Corporate Knights, for example, named Geberit one of the 100 most sustainable businesses.

SYSTEM TECHNOLOGY THAT PAYS OFF

More and more private, institutional and public building owners are now realising that sustainable construction is a good investment. This offers Geberit's perfectly designed installation systems even more opportunities to prove their worth.

A sustainable building is the result of a fundamental decision. The sanitary technology has to be able to fully support this decision. Under no circumstances should it bring about situations that hinder the achievement of the building

owner's ambitious goals or add needless expense to it.

With a complete and perfectly coordinated range of installation systems, Geberit offers customised solutions for every conceivable construction situation. Whether building sanitary pre-wall installations and partition walls in lightweight construction projects or installing sanitary systems in solid construction projects, the system technology from Geberit always creates the perfect base. It guarantees maximum comfort, freedom as to where the sanitary appliances can be positioned and rapid construction progress. It also complies with all current fire protection and sound insulation requirements. This ensures that planners and plumbers do not have to make any compromises that could turn out to be unsatisfactory, even in the medium term.

Just how sustainable a building really is usually only becomes clear in its usage phase. As demonstrated time and again, designed system solutions that may perhaps initially be more expensive can

prove considerably less expensive when the entire service life of a building is taken into consideration. Each time sanitary installations are adapted or added to after installation, it pays to have opted for the proven system technology from Geberit right from the outset.

Acoustic insulation that delivers on its promises

REDUCTION IN AIRBORNE SOUND TRANSMISSION THROUGH:

- Certified pre-wall installations or complete, certified installation walls
- Sound insulation mats
- Encapsulation of discharge pipes and stacks
- Use of acoustically optimised discharge pipes

REDUCTION IN STRUCTURE-BORNE SOUND TRANSMISSION THROUGH:

- Decoupling of pipes from the building structure
- Elastic fastenings for sanitary appliances
- Solid-borne sound insulation between the pipe and building
- Certified pre-wall installations or complete, certified installation walls

Paths travelled by noise from sanitary appliances
